Notes

note01: Using a function from another file

method-1 (without using header files)

Example:

```
## main.c

void get_speed() {
    ...
}

## speed.c

extern void get_speed();

int test {

    get_speed();
}
```

method-2 (with using header files)

Example:

```
## main.c

void get_speed() {
    ...
}

## main.h

void get_speed();

## speed.c

#include "main.h"

int test {

    get_speed();
}
```

note02: different methods of using a function

Examples:

Example1 (ERROR)

```
## main.c #######################

int main() {
    get_speed();
}

int get_speed() {  // must be before main()
    ...
}
```
